

Added the 2 new search

The screenshot displays the RecruitBot interface in Hybrid Search mode. On the left sidebar, under 'SEARCH MODE', the 'Hybrid' option (Weighted BM25 + vector) is selected. Below this, the 'Search Weights' section shows sliders for BM25 (set to 50%) and Vector (set to 50%). The main panel on the right features a greeting 'Hi, I'm RecruitBot.' followed by instructions to describe the candidate. It lists four search methods: Vector (semantic similarity), BM25 (keyword matching), Hybrid (combine both), and ScoreFusion (AI reranking). A search bar at the bottom contains the text 'Describe the candidate you're looking for...'. Above the search bar, there are four example queries: 'Selenium QA 3 yrs', 'Python ML dev', 'Java AWS backend', and 'Lead QA Cypress'.

ScoreFusion

The screenshot displays the RecruitBot interface in ScoreFusion mode. The left sidebar shows 'ScoreFusion' (Hybrid results with Groq reranking) as the selected search mode. The main panel on the right shows search results for the query 'Describe the candidate you're looking for...'. The results are ranked by Groq Relevance. The top result is for 'Sujis', a Dedicated Analyst with 2+ years of experience, with a relevance score of 1.000. The second result is for 'Santhana Bharathi M', an AI/ML Engineer with 2+ years of production experience, with a relevance score of 0.950. The third result is for 'Job Description', a Finance Analyst, with a relevance score of 0.100. Each result includes a 'Candidate resume' link and a 'Select to view profile' button. The interface also includes a search bar at the bottom with the text 'Describe the candidate you're looking for...'.
