

Day 2 – Pushing all the files to MongoDB

The screenshot shows the MongoDB Cloud interface. On the left, the 'Data Explorer' sidebar shows the hierarchy: Organization (Logesh's Org - 2026-...), Project (Project 0), and Cluster (Cluster0). Under Cluster0, the databases 'RAG_TC', 'admin', 'local', and 'resume_rag' are listed. The 'resumes' collection is selected under 'resume_rag'. The main panel shows the 'Documents' tab for the 'resumes' collection, displaying 179 documents. A query filter is set to '{ field: 'value' }'. A document is expanded, showing fields: '_id', 'contentHash', 'createdAt', 'embedding', 'embeddingDimension', 'embeddingModel', 'fileName', 'name', 'rawText', 'role', 'skills', and 'updatedAt'. The document details are as follows:

```
