

Day1

Day2

The screenshot shows the Logz.io Data Explorer interface. The left sidebar contains a 'Data Explorer' section with 'My Queries' and 'Data Modeling'. Below this is a 'CLUSTERS (1)' section with a search bar and a list of clusters: 'Cluster0', 'RAG_3D', 'admin', 'local', and 'sample_mflix'. The main panel displays the 'testcases' collection under the 'RAG_3D' cluster. It shows a search bar with the query 'Type a query: (field: "value") or Generate query'. Below the search bar, there are buttons for 'View monitoring', 'Visualize Your Data', 'Documents 4.4K', 'Aggregations', 'Schemas', 'Indexes 1', and 'Validation'. The search results show a list of documents, with the first document displayed in a code block:

```
{
  "_id": "ObjectID('6a0041019379e39672b6847f')",
  "module": "Registration",
  "id": "TC_005",
  "prerequisites": "PIN/QR Number",
  "title": "Conversion from PIN/QR Reg to UID",
  "description": "Verify Conversion from PIN/QR Reg to UID",
  "steps": "1. Launch the application\n2. Login to the application with valid creden.",
  "expectedResults": "Should get convert successfully from PIN/QR Reg to UID",
  "automationManual": "Automated"
}
```

At the bottom of the interface, there is a status bar that reads 'Alert System Status: All Good'.
